www.planetbravo.com

"BRAVO PlanetBravo! This enriching camp has it all: high quality staffing, cutting edge technology instruction, outdoor fun, and loads of laughs for kids of all interests. Our community is very lucky to have this incredible resource in our own backyard."

--- Myra L., Beverly Hills

ABOUT OUR CAMP

Celebrating its fifth summer of fun, Techno-tainment Camp 2007 is coming to a location near you. Over the years, our campers have explored the world of entertainment technologies including video game creation, movie-making, website design, cartoon animation, robot construction and much more.

Our students enter camp with the love of entertainment, and leave each week with entertainment they love... because they made it themselves! It's a thrill we have witnessed each summer, and look forward to it every year.

We are very happy to offer this innovative and fun program on a community level. Unlike technology camps that run on busy college campuses, we are able to provide a safe, friendly environment **close to home**. Community is very important to us, and by running our camps in local schools and recreation centers, we are able to focus more on what makes us a special multimedia experience for children and young adults.

HOW CAMP WORKS

* Techno-tainment Summer Camp runs one-week sessions Monday-Friday 8:30pm-4:30pm for students entering grades 2-10 (varies per location).

* Students sign-up for one course during their week with us. We have several courses a week from which to choose. Children most certainly may sign up for more weeks in different or the same classes. The projects never end!

* Each day is balanced with indoor and outdoor activities, surprise seminars, lunch and snacks, and of course, network game times! For those who don't play computer games, we've got lots of other activities as well.

* Many more details online at www.planetbravo.com or call us at 310.443.7607.

Come be a part of the fun. It will be an experience you will never forget.

FUN FACTS:

Over the last 5 years, students all across Los Angeles have come to experience what we have to offer, but what makes us so special?

*First and foremost, we are **LOCAL!** Unlike technology camps that manage locations spread throughout the entire country, our entire team, from counselors to founders, are right here in this city! That means that we are closer to your home. Our goal is to make an impact in the community that we share.

*Since we are an '**Entertainment Camp**' we have campers who are young and old, technical and sporty, beginners and experts, **boys and girls!** Don't call us a 'computer camp'!

*We are **teachers** first, **entertainers** second, and **computer people** third. We believe that in addition to children learning to use technology, children should use technology to learn. We know technology is important to everyone's future. We show children how to have fun while thriving with today's best tools.

*We're proud that over **70%** of our staff keeps coming back year after year. We have a happy staff, and they really bond with our campers. When you come to camp, you become a part of the Techno-tainment family.

*Did we mention our camp costs **less** than all of those other technology camps?

Please visit us online at www.planetbravo.com or call us at 310-443-7607 for more information.

CAMP COURSES

*grades may vary by location

Students Entering Grades 2-3

Multimedia Arts: This course is definitely recommended for first-time Techno-tainers! Campers play with some of the best programs for creating great multimedia works of art. Photo-editing, Music Creation, Slideshows, Video-editing, and much more are introduced in this exciting class.

Creative Crew: This course brings together our youngest campers into one group and focuses on teamwork while making their own collaborative movie! There is nothing more fun to watch than 7 and 8-year-olds working video cameras and acting in front of the camera! One of our camp favorites!

Students Entering Grades 4-10

Video Game Design: Come make your own video game and get your friends addicted to something you made yourself! We use Multimedia Fusion v.2. With all new libraries of characters (and much more), it's better than ever. This summer - you're making your games to be played on the web! Seriously! Your friends will be able to play your video games online!

How-To-Hollywood: With student-made movies popping up all over the World Wide Web, Hollywood is no longer limited to the silver screen. In this course, our students make movies that can be enjoyed by not just a few friends, but thousands of people. Seriously! Not all students will want that kind of stardom, but they can still keep their movies private and show them off to their friends and family!

Website Design: Are you "E-famous"? Do you want to be? In this course you'll learn how to design, create and play with your own website! Put up crazy pictures for all your friends to see, or make a site dedicated to your favorite sport, celebrity or hobby - the possibilities are endless! Learn how to create a website with software that may already be on your computer right now!

Cartoon Craze: This course gives our campers the world of animation to create their very own cartoons to share online. We use a multitude of the latest programs to create animations. Variations on this course have changed over time, but this year, students are creating cartoons to be viewed especially on the web.

Students Entering Grades 6-8 (offered in Beverly Hills)

Game Programming: Unlike our Game Design course, in this one you are actually PROGRAMMING using programming language! If you are ready to really learn about the making of 3D games, come learn to program using text and symbols. It's fun!

RoboHead: This course brings exciting and fun engineering into our campers' hands. Our Vex Design Systems return again with new robot ideas for 2007. Do you still have your robot from last summer? Bring it back for a facelift! There is a lab fee of \$125 for this course for parts, supplies, and of course, the robots!

"My kids begged me get them to camp early and actually ran into the classroom to get started each morning. I would pick them up at the very end so they wouldn't miss anything and be mad at me!"
--- Ilene Knebel, Los Angeles

INDUSTRY PARTNERS:

WE'VE TEAMED UP WITH SOME OF THE HOTTEST COMPANIES IN THE WORLD OF TECHNOLOGY TO BRING OUR CAMP TO THE SPEED OF LIGHT!

"In 9 years of camp experiences with two kids I have never seen such a high caliber staff. The courtesy and caring along with the very fun and friendly personalities made an already great program so much better."
